This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 2 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

**1. Basis of the report**

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☐ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

#### 4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.

---

International application No. PCT/GB00/01449

**Re Item V**

**Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The present invention relates to a fire resistant textile material.

The document D1 = DE 296 11 356 U (X-doc.), that is considered to represent the **closest prior art**, is cited in the description, and discloses a textile material for gloves that is resistant to fire and cutting. However, D1 fails in disclosing a backing scrim with low yarn density.

The remaining documents of the search report (A-doc.) concern the technical background.

The **technical problem** addressed by the invention is to provide a fire resistant textile with improved thermal protection properties, that is moreover light and comfortable to wear.

The **solution** consists in providing a textile material according to claim 1, in which a dense outer layer of fire resistant fibres, is backed by a scrim of low thermal shrinkage fibres.

The backing scrim supports the fire resistant layer, and ensures at the same time bulkiness for improved thermal protection, and lightweight for improved comfort.

The available prior art documents, be they taken alone or in combination, fail in disclosing or suggesting such a solution to the problem to be solved.

Therefore the independent claim 1 and the dependent claims 2-12 seem to meet the requirements of Article 33 (1), (2), and (3) PCT.

**Re Item VII****Certain defects in the international application**

The independent claim is not drafted in the two-part form (Rule 6.3 b) PCT). This defect would need to be overcome when entering the European phase.

The citation of the closest prior art document (DE 296 11 356 U) contains a mistake (description, page 2, "U" document and not "A" document).

**Re Item V**

**Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The present invention relates to a fire resistant textile material.

The document D1 = DE 296 11 356 U (X-doc.), that is considered to represent the **closest prior art**, is cited in the description, and discloses a textile material for gloves that is resistant to fire and cutting. However, D1 fails in disclosing a backing scrim with low yarn density.

The remaining documents of the search report (A-doc.) concern the technical background.

The **technical problem** addressed by the invention is to provide a fire resistant textile with improved thermal protection properties, that is moreover light and comfortable to wear.

The **solution** consists in providing a textile material according to claim 1, in which a dense outer layer of fire resistant fibres, is backed by a scrim of low thermal shrinkage fibres.

The backing scrim supports the fire resistant layer, and ensures at the same time bulkiness for improved thermal protection, and lightweight for improved comfort.

The available prior art documents, be they taken alone or in combination, fail in disclosing or suggesting such a solution to the problem to be solved.
